DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 17-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,280,290; claims 1-20 of U.S. Patent No. 6,045,439; and claims 1-18 of U.S. Patent No. 5,893,796. Although the conflicting claims are not identical, they are not patentably distinct from each other because: a polishing surface with a solid transparent section formed in the polishing surface; an aperture formed in an opposing surface does not define over the previous patent with the same essential subject allowable subject matter as before being a polishing pad with two surfaces, a solid transparent section formed in the polishing surface, with an aperture formed in the second surface

and a transparent plug is claimed instant and parent applications as well. Furthermore, the dependent claims also claim elements which do not distinguish over the parent patents.

Response to Arguments

3. Applicant's arguments filed 4/21/03 and 6/5/03 have been fully considered but they are not persuasive.

4. Applicant's arguments with respect to claims 17-61 have been considered but are moot in view of the new ground(s) of rejection.

a. The subject matter was considered the subject matter has required a Double patenting rejection. A Terminal disclaimer must be filed to overcome the rejection.

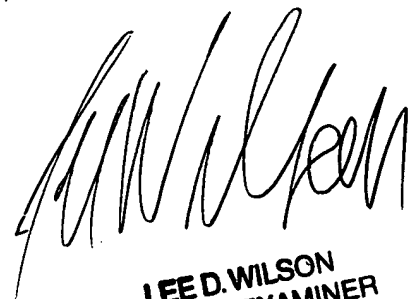

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Birang et al disclose a device.
